PROFILE

I'm a budding full-stack web developer, always excited about diving into new projects in the digital realm. My passion for technology and coding drives me to continually improve myself and acquire new skills. I thrive on a creative and collaborative approach, and I make it a point to maximize this approach in my projects. With experience in both front-end and back-end development, I focus on enhancing the user experience by effectively utilizing my skills.

PROJECTS

RESTAURANTS APP

ReactJS, Redux, NodeJS, Stripe

- Discover popular restaurants and dishes, and search for dishes in any category.
- Explore user reviews of dishes.
- Track your placed orders and leave feedback after delivery.
- You also have the option to become a seller, where you can showcase, add, update, and remove products, as well as manage incoming orders.

SOCIAL MEDIA APP

ReactJS, Redux, NodeJS, TailwindCSS, MongoDB

- Share photos and content with your followers.
- Search for and send follow requests to other users.
- Customize your profile and switch to a private account.
- Like and comment on posts.
- Manage incoming follower requests and your sent requests.

E-COMMERCE APP

ReactJS, Redux, NodeJS, Express, MongoDB, TailwindCSS

- You can browse and add products to your cart, as well as manage and remove items.
- Update your user information, including adding new addresses.
- Access your order history, write product reviews, and log in as a seller to manage your products.

CHAT APP

SOCKET.IO, ReactJS, Redux, NodeJS, Express, MongoDB

- A basic CHAT APP I made using SOCKET.IO.
